

# Priya Singh

Kanpur, Uttar Pradesh | priyasinghrathore730@gmail.com | +91 74540 64986 | linkedin/priya-singh  
github/Priya220105

## Career Objective

B.Tech CSE student (Class of 2027) with hands-on experience building multi-agent AI systems and full-stack web applications using Python, JavaScript, and Flask. Proficient in REST API design, OOP, DSA, and both SQL and NoSQL databases. Seeking a Software Development Engineer Internship to contribute to scalable, distributed systems and grow in a fast-paced product environment.

## Education

|                                                                                       |                     |
|---------------------------------------------------------------------------------------|---------------------|
| <b>Pranveer Singh Institute of Technology, Kanpur</b>                                 | Oct 2023 – Jul 2027 |
| B.Tech in Computer Science   Aggregate: <b>76.15%</b> (till 5 <sup>th</sup> Semester) |                     |
| <b>K. R. Education Centre, Kanpur</b>                                                 | 2021 – 2023         |
| Intermediate (XII) – 77.6%   High School (X) – 89.6%                                  |                     |

## Technical Skills

- **Languages:** Python, Java, JavaScript, C, C++
- **Data Structures & Algorithms:** 200+ LeetCode problems; 5-Star C & 4-Star Problem Solving on HackerRank
- **Web & Backend:** Flask, REST APIs, Node.js (basics), React, HTML, CSS
- **Databases:** MySQL, MongoDB (basics)
- **ML & AI:** TensorFlow Lite, MediaPipe, OpenCV, Claude API, Groq, OpenRouter
- **Core CS:** Object-Oriented Programming, Operating Systems, Data Structures, Algorithms, SDLC
- **Tools:** Git, Jupyter Notebooks, Linux/Unix (basics), Chrome Extension APIs

## Projects

- **AgentFlow – Multi-Agent Research Assistant** (*Ongoing*) github/AgentFlow
  - Built a Claude API-based multi-agent pipeline with specialized agents for task decomposition, web search, summarization, and fact-checking; designed modular data flow between agents.
  - Exposed REST API endpoints via Flask; implemented MCP-based critique loops to reduce hallucinations. Deployed on Render.
  - Stack: Python, Flask, React.
- **SanketAI – AI Sign Language Learning Platform** (*Ongoing*) github/SanketAI
  - Built an end-to-end ML pipeline for real-time ISL/ASL gesture recognition: custom dataset collection and annotation, preprocessing with OpenCV and MediaPipe, model training, and .tflite conversion for on-device inference via webcam.
  - Stack: Python, TensorFlow Lite, MediaPipe, OpenCV.
- **Notify – Productivity Chrome Extension** github/Notify
  - Offline-first Chrome extension for task tracking, reminders, and AI-powered motivational messages. Built with HTML, CSS, JavaScript, and Chrome Storage API; follows OOP principles for modular design.
- **AI API Experiments & Agent Systems** github/ai-api-projects
  - Hands-on experiments with Claude API, Groq, and OpenRouter: tool-use agents, multi-turn chat apps, and prompt-engineering notebooks in Python/Jupyter. Explored API authentication methods and response-handling patterns.

## Achievements

- Ranked among the **Top 50 Contributors** in IEEE Summer of Code 2025.
- Secured **1st Position** in the Blind Code competitive programming event at PSIT, Kanpur.
- Earned **5-Star (C Language)** and **4-Star (Problem Solving)** ratings on HackerRank.
- Solved **200+ problems** on LeetCode, strengthening data structures and algorithmic skills.

## Certifications

---

- **Anthropic** – Claude with the Anthropic API (*May 2026*)
- **Infosys Springboard** – Python Fundamentals (Parts 1 & 2), HTML5, CSS3
- **IEEE Summer of Code 2025** – Certificate of Recognition
- **Hack With Gujarat** – Hackathon Participation
